Role   : Designer, Developer
Duration   : Dec2014 - April 2015.
Team Size   : 3
Technology Used: asp.net with C# coding, SqlServer2008, Ajax
Description   : Employee Performance Monitoring System (EPMS) is a
                         process by which Managers. And Employees work together to
                         Plan, monitor and review an employee's work objectives and
                         Overall contribution to the organization.
Work Description   : EPMS involves more than simply providing an annual review

For each Employee.
Performance planning: performance planning is the first
Crucial component of Any performance management process
Which forms the basis of performance Appraisals.
Performance Appraisal and Reviewing: The appraisals are
Normally performed Twice in a year in an organization in the
Form of mid reviews and annual Reviews which is held in the
End of the financial year.
Rewarding Good Performances: This is a very vital component
As it will determine the work motivation of an employee.
